

# Understanding the Water Status Indicators

Each icon on the Water Status page represents a different condition of the ditch and reviewing them regularly will help you know exactly what is happening at any given time. Whether the ditch is flowing, temporarily off, under repair, limited due to drought, or in the off-season, the status shown will always reflect the most current information available. Before calling, texting, or escalating an issue, please check the Water Status page first. In most cases, the answer you need will already be posted there — and if a larger or ongoing issue is expected to continue, the News & Updates page will also include additional details.

## State 1 — All Clear

 FLOWING	<p><b>WATER IS FLOWING</b></p> <p>The system is running normally. Check your sediment box if you have low or no flow at your property. If the issue persists, call or text 720-663-7094 with your name, address, and a description.</p> <p><i>Last updated: [TIMESTAMP] — No action needed unless you have a property-level issue.</i></p>
--	--

## State 2 — Scheduled Off

 SCHEDULED OFF	<p><b>WATER IS TEMPORARILY OFF — SCHEDULED</b></p> <p>This is a planned outage for rotation, maintenance, or upstream allocation. No action is needed. Water will return as scheduled below.</p> <p><i>Expected return: [DATE / TIME] — Last updated: [TIMESTAMP] — Check back here before calling.</i></p>
--	---

## State 3 — Unplanned Outage

 OUTAGE	<p><b>WATER INTERRUPTION — UNPLANNED</b></p> <p>We are aware of <a href="#">an</a> issue and actively working to resolve it. This may be a break, blockage, or upstream supply problem. We will update this page as soon as we have more information.</p> <p><i>For urgent issues: Text "URGENT: [your name, address, description]" to 720-663-7094 — Last updated: [TIMESTAMP]</i></p>
---	---

## State 4 — Limited Flow / Drought Restrictions

 LIMITED	<p><b>LIMITED WATER FLOW — DROUGHT RESTRICTIONS</b></p> <p>Supply conditions are reduced. Expect lower pressure or rotation scheduling. Please follow your assigned rotation and conserve water. Check the News &amp; Updates page for the current rotation schedule.</p> <p><i>Follow rotation schedule — Conserve water — Last updated: [TIMESTAMP]</i></p>
--	---

## Optional: State 5 — Season Closed (Off-Season)

 OFF SEASON	<p><b>DITCH IS NOT IN SERVICE — OFF SEASON</b></p> <p>The Allen &amp; Reno Lateral Ditch is not currently flowing. The irrigation season typically begins in late April or early May depending on Swadley Ditch timing and snowpack conditions.</p> <p><i>Watch this page and your email for the season start <a href="#">announcement</a> — Last updated: [TIMESTAMP]</i></p>
